Product Support Services

Sevocity offers live US-based support and ongoing web-based training free of charge for all customers.

For questions not answered in this guide or to schedule a personalized training session, please contact a Support Specialist at **1.877.777.2298**, support@sevocity.com, or via the **Contact Us** option under the **Help** menu in Sevocity.

About Sevocity v.12

Sevocity v.12 is ONC 2015 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable eligible certification criteria adopted by the Secretary of Health and Human Services.

ONC Certified HIT® is a registered trademark of HHS.

Patient Portal Enhancements

The patient portal enrollment process has been improved with the following changes:

- Patient email requirement has been removed
- Generate Password feature has been added for improved security
- Portal log in instructions are generated when a patient is enrolled or has their password reset
- Portal log in instructions are generated in Spanish for patients whose Preferred Language is Spanish

Enrolling a patient or patient-authorized representative in the patient portal also provides the enrollee with the ability to access their health information through a third-party application of their choosing. To provide patients or their authorized representatives with the credentials to allow them to share their health information with a third-party application of their choosing, go to Tools > Patient Portal > Print Patient QR Code

Enrolling patient in the portal

Because the patient email address is no longer required at enrollment, patients will need to opt in to receive email notifications from the **My Settings/Portal Activity** tab in the portal to be notified when they receive a new message.

A new Patient Portal Reference Guide for the clinic and a patient-specific guide for using the portal can be located in the [Sevocity Resource Library](#).
